Brillant is better

Brillant® Brackets
Discrete and comfortable

Perfect aesthetics
Brillant Brackets are made from a new tooth coloured material and almost invisible.

Outstanding comfort
Brillant Brackets offer excellent bond strenght due to the sandblasted base with mechanical retention and guarantee gentle and fast treatment.

Simply brillant
The special surface characteristics prevent staining and give a high colour stability.

Brillant® Brackets

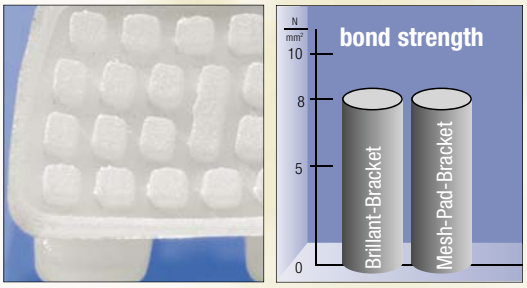

CE 0297

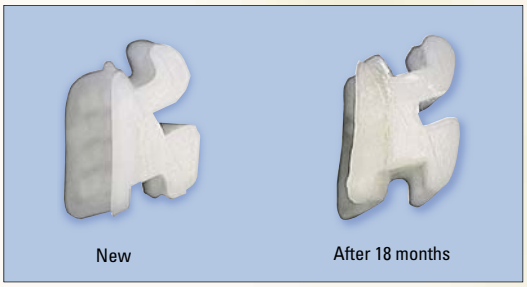

Polyoxymethylene is a material giving high colour stability, low friction and high wear resistance.

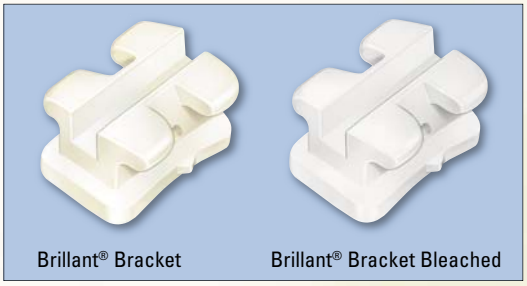

Frictions tests of different bracket slots with a NiTi archwire show, that Brillant Brackets have only 30% friction compared to metal brackets or ceramic brackets with metal slots and only 10% friction compared to a ceramic brackets without metal slots.

The uniquely designed and sandblasted bracket base offers excellent bond strength. Brillant Brackets offer the same bond strength as mesh pad brackets. Any mix or single paste adhesive is suitable for bonding. No additional bracket primer or adhesion booster is necessary.

Effortless debond after 18 months: No fractures and no enamel chipping.

Brillant® Brackets are available as Roth-System, Standard-Ricketts-System und Standard-Edgewise System.
Brillant® Brackets Bleached are available as Roth-System.
Canine brackets with tooth-coloured hooks are available in the Roth-System.
